Description:

10 SCECH(s) Program Description: This course provides information about the school improvement process in the state of Michigan. The course consists of five modules: One introduction module and four modules covering the stages of the school improvement process (Gather, Study, Plan and Do). This course is strongly recommended for members of school improvement teams, but it is also appropriate for individuals curious about the school improvement process. For those on a school improvement team, it is suggested that the team proceed through each module at a similar pace and work on course activities together using actual data, challenges and successes from their building or district. Modules consist of a combination of activities (all of which are captured in a journal), videos, presentations of content, and quizzes to check for understanding. There is also a social network used for some activities, which will remain available to participants for ongoing collaboration beyond the completion of the course. The social network will also provide access to all of the resources from the course including PDF versions of all of the course content. Online peer coaches will be responsible for grading submitted activities, and will be available for additional support if needed by the course participants. Grading of submitted activities will be based on completion and participation in all course content and activities. Enrollment Note: New module sessions start every Monday. Learners will be have access to the module on noon the Monday following their enrollment. For example, if you enroll for this module on a Wednesday, you will be able to start the module the following Monday at noon. If this is your first Moodle course, your login credentials for Moodle will be emailed to you. Your login ID will be the same as your LearnPort ID. Your password will be a temporary password, and you will be required to change it.

Required
Below are required activities for this curriculum that must be completed in the order that is specified.

Order	Title	Type	Status	Equivalent Content Completed
1	Michigan Continuous School Improvement (MI-CSI)	🖵	Not Enrolled	

Below are required activities for this curriculum. They can be completed in any order.

Title	Type	Status	Equivalent Content Completed
No records found.
